

Imagine...

all within the  
**Buoyancy**  
of Deep  
**Warm Water**

**THERMA**pool™  
It's all about feeling better

ThermaPool is a revolutionary new way to enjoy the benefits of having access to deep warm water therapy, on a daily basis, in the privacy of your own home. All across the country, doctors are prescribing aquatic therapy for patients suffering from a variety of physical ailments... yet getting access to a deep warm water therapy pool is getting harder and harder to do these days.

ThermaPool has changed that. By creating an easy and affordable at-home therapy pool solution, ThermaPool has made it possible for anybody to have access to aqua-therapy. And the American made ThermaPool can be made to fit any available space.

When it comes to aquatic therapy a ThermaPool better than a spa because they are typically only about 2.5 feet deep, whereas a ThermaPool can be twice as deep.

In addition, a spa's interior is filled with a variety of seating arrangements that interfere with an occupant's ability to do therapy exercises. A ThermaPool provides ample room to stretch, expand, swim, jog, and a variety of other aquatic exercises. For users seeking access to deep warm water to help strengthen and rehabilitate a part of your body, ThermaPool is the easiest and most affordable choice available today.

ThermaPools incorporate a unique patent pending feature in that they offer you a set of grommets, on each corner of the pool, at three different levels. These grommets, along with our ThermaBand line of exercise equipment, allow you to create an unlimited number of exercise routines that help you strengthen and rehabilitate virtually every muscle in your body.

Again, unlike a conventional spa, a ThermaPool provides you with total mobility and flexibility to work the area of your body you need... even if it is the whole body.

Imagine What You Can Do with a **ThermaPool®** in Your Home

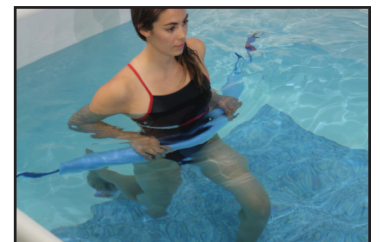

Stretch

Strengthen

Build or Re-build

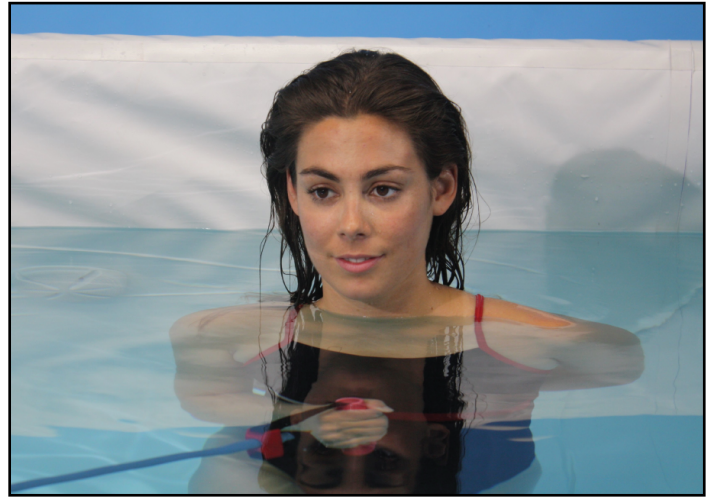

Condition

## BUOYANCY BENEFIT

The health benefits of conditioning, strengthening and rehabilitating exercises are amplified in a ThermaPool because it provides as much as 5 feet of warm water depth which removes up to 80% of your body's weight. Allowing you to focus on strengthening any part of your body without the added stress of the body weight associated with dry land exercises

In addition, the presence of warm water has been proven to soothe the nerves, promote better circulation and improve the conditioning results\*. Which is why more and more doctors are prescribing aqua-therapy.

ThermaPool is leading the charge in developing aquatic-based exercises designed to focus on each part of the body within the body of warm water.

Working with MMA martial arts expert and aquatic kinesiologist Mark Elmasry, a certified strengthening and conditioning therapist, we are developing over aquatic-based therapeutic exercise videos that will help to strengthen and rehabilitate every muscle in the body. These will be available free of charge to all our customers as they become available.

### Did You Know a ThermaPool May be Tax Deductible?

A **ThermaPool** can qualify for a tax deduction for the following reasons; it is not considered a home improvement, and, if the whole purpose of the pool is for doctor prescribed therapy only, then it meets the standards under IRS form number 502.

### Did You Know a ThermaPool Offers Financing Options?

We know how important a **ThermaPool** can be for our customers. As such, we have done our very best to make it as affordable as possible while still maintaining the necessary quality for it to do its job. But we also scoured the financial world to provide multiple financing options. These of course vary by the individual needs of each buyer. [Learn More about this >>>](#).
